Model P6716AS

Strong Hot Drop-Forged Blades

Virtually unbreakable, hold an edge best, won't spread when cutting the toughest materials and cut all the way from pinch point to the tip.

Deep Serrated Blade

Improves cutting by holding soft materials when cutting.

3" Cut Length

Makes long cuts easy & straight.

8:1 Power Ratio

Compound leverage handle action makes cutting easy even on the toughest materials.

You Asked For It!

14-Inch Bent Handle Tinner Snip

Made in U.S.A.

Model P147CPB

Forged Seamer Tongs

Made in U.S.A.

24" (610mm) length

**STRONGER
CONSTRUCTION
IMPROVES
BENDING**

- Bent handle positions tradesman user's hands safely above material being cut.
- Hot drop-forged of molybdenum alloy steel for exceptional strength.
- Cuts up to 18 gauge cold rolled sheet metal.
- Combination blade pattern cuts straight and wide circles and features 3-7/8" (98mm) cut length.
- Ideal for cutting lathe board.

- 1/4" (6.35 mm) raised graduations for tong hold accuracy.
- 1-1/8" (29mm) throat depth capacity.
- Cushioned handles provide comfort and non-slip grip.
- Forged blades and handles for exceptional strength and durability.

- Formed of heavy-duty 16 gauge steel for folding strength.
- Wide depth side folds up to 1" (25 mm) and narrow depth side folds up to 3/8" (10 mm).
- Sight gauges allow you to line up material for accuracy.
